### SLEW FAMILY TO ATONE FOR "BLASPHEMY."

The crimes were committed, he declares, on the anniversary of the day when, as a child, he "blasphemed against the Holy Ghost," and he was seeking atonement by fire and blood.

## SCIENTISTS ARE ENROUTE TO BIG DELTA OF YUKON

To Conduct Extensive Study of Bird, Insect and Plant Life There.

Enroute to interior and the far western coast of Alaska to spend several months in scientific study of bird insect and plant life, B. S. Dickey, M. Dunn and F. P. Davis, prominent Eastern scientists passed through Juneau last night on the steamer Alaska. They conferred with Dr. S. Hall Young to whom they had letters of introduction.

The members of the party are said to be specially commissioned by the Federal Bureau of Biological Survey to conduct their studies which will be made largely in the Yukon Delta Bird Reserve. This reserve is under the jurisdiction of the Survey. One of the members is a specialist on bird life, a second on insects and will make a particular study of butterflies, and the third will study the mosses in that region.

The party will go direct from Seward to Fairbanks where it will be met by a team of 10 dogs and an agent of the Biological Survey. From there it will proceed on its mission, traveling by the way of the Kantishna, Lake Minchumina, the upper Kuskokwim, across country to Iditarod and down the Iditarod and Innoko Rivers to Holy Cross and from there into the Yukon Delta. It is planned to be in the Delta reserve at the time of the breakup. In this district is said to be located one of the greatest bird breeding grounds known anywhere. Several weeks will be spent by the entire party in the reserve. In July, one member of the party expects to work his way back up the Yukon while the other two travel along the coast toward the mouth of the Kuskokwim River. A second will come out next fall by way of Unimak Pass. Mr. Dickey may remain somewhere in the Kuskokwim district during all of next winter.
